* Game Directions

Vocabulary Match Game (also called the Match Game)

1. Put each word on a 3x5 card so that each word has its own card. This card is called a Word Card.
2. At Dictionary.com, find and read the definition of the first word.
3. In your own words, write *your own definition* on a different 3x5 card.
4. Repeat for each Word Card so that each definition has its own card. You now have a Definition Card that matches a Word Card.
5. On the left, place all of the Word Cards face down in a grid.
6. On the right, place all of the Definition Cards face down in a second grid.
7. To play, turn over one Word Card (in the left grid) so that it's "face up" (the word can be seen); then turn over one Definition Card (in the right grid) so that it's also "face up." If the cards match, you keep (remove) the pair. If the cards do not match, turn both cards back over (face down) and try again by turning over a new Word Card and Definition Card.
8. With two or more players, alternate play/take turns.
9. Continue until all of the words and their definitions are matched.
10. The player with the most matches wins!
